### **DETAILED ACTION**

Examiner acknowledges receipt of declaration and preliminary amendment A filed 05/21/02, IDS filed 10/31/02 and 12/20/02, supplemental amendment filed 03/11/03 and 04/15/03 and amendment B filed 04/14/03.

#### ***Information Disclosure Statement***

1. The information disclosure statement filed 10/31/02 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

The non-US references cited in the Form PTO-1449 are not available to the examiner to review. Examiner respectfully requests applicants to submit the non-US references.

#### ***Election/Restrictions***

Applicants elected the polymer that is characterized by the repeat unit having structural formula (VI) and identified claims 36-38, 42-44 and 48-50. Applicants further indicate that pharmaceutical composition claims 39-41 and method claims 45-47 that comprise polymer having the structural formula (VI) be examined with claims 36-38, 42-44 and 48-50. Examiner finds the above request persuasive and thus examines claims 36-50.

#### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed.

Art Unit: 1615

Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 36-41 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5, 10, 20-24 of copending Application No. 10/051,766, now published application number US 2003/0021761. Although the conflicting claims are not identical, they are not patentably distinct from each other because the composition used in the co-pending application to treat mucositis comprises the polymer of said claims of the examined application. The co-pending application differs from the instant application in that the claims of the co-pending application are directed to method of treating and the instant claims are directed the polymer and pharmaceutical composition that comprises the polymer. However, the method of the co-pending application utilizes a composition comprising the polymer of the instant application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

4. Claims 42-50 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach a method of treating microbial infections where the method comprises administering to a subject in need thereof a composition that comprises the polyionene polymer having a repeat unit of structural formula (VI).

Art Unit: 1615

5. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicants' cooperation is requested in correcting any errors of which applicants may become aware in the specification.
